LUXEON CoB with CrispWhite Technology (Gen 2)

Fashion retail lighting that makes an impact, revealing the whitest whites

The second generation of LUXEON CoB with CrispWhite Technology creates the most impactful retail lighting ever available by revealing the whitest whites. LUXEON CoB with CrispWhite Technology delivers a natural crisp whiteness by activating Fluorescent Whitening Agents (FWAs) in paints and fabrics to attractively display merchandise in retail shops; ideal for CDM/CMH replacement.

General Product Information

Product Test Conditions
LUXEON CoB with CrispWhite Technology (Gen 2) LEDs are tested and binned with a DC drive current specified below at a junction temperature, $T_j$, of 85°C:

- 200mA – LUXEON CoB 1202s
- 200mA – LUXEON CoB 1202
- 300mA – LUXEON CoB 1203
- 450mA – LUXEON CoB 1204
- 600mA – LUXEON CoB 1205
- 900mA – LUXEON CoB 1208
- 1200mA – LUXEON CoB 1211

Part Number Nomenclature
Part numbers for LUXEON CoB with CrispWhite Technology (Gen 2) follow the convention below:

- \text{L 2 C 5 – A A B B C C C C D E E C 0} \\

Where:
- \text{A A} – designates nominal CCT (30=3000K)
- \text{B B} – designates minimum CRI (90=90CRI, 95=95CRI)
- \text{C C C C} – designates product configuration (1202, 1203, 1204, 1205, 1208, 1211)
- \text{D} – designates options for product specification
- \text{E E} – designates Light Emitting Surface (LES) size (06=6mm, 09=9mm, 13=13mm, 15=15mm, 19=19mm)

Therefore, the following part number is used for a LUXEON CoB 1203, 3000K 90CRI, with a 9mm LES:

- \text{L 2 C 5 – 3 0 9 0 1 2 0 3 E 0 9 C 0}

Lumen Maintenance
Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance
Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. The second generation of LUXEON CoB with CrispWhite Technology is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

</tbody>
</table>

Notes for Table 1:
1. Lumileds maintains a tolerance of ±2 on CRI and ±6.5% on luminous flux measurements.
2. Typical CRI is approximately 2 points higher than the minimum CRI specified, but this is not guaranteed.
3. Maximum luminous flux is 10% above typical luminous flux.
4. Light Emitting Surface (LES) is the inner diameter (phosphor area) inside the dam.

Optical Characteristics

<td>Allowable Reflow Cycles</td>
<td>3</td>
</tr>
<tr>
<td>Reverse Voltage ($V_{reverse}$)</td>
<td>LUXEON LEDs are not designed to be driven in reverse bias</td>
</tr>
</tbody>
</table>

Notes for Table 4:
1. Proper current derating must be observed to maintain the junction temperature below the maximum allowable junction temperature.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called “ripple,” are acceptable if the following conditions are met:
   - The frequency of the ripple current is 100Hz or higher
   - The average current for each cycle does not exceed the maximum allowable DC forward current
   - The maximum amplitude of the ripple does not exceed the maximum peak pulsed forward current
3. At 10% duty cycle with pulse width of 10ms.

Packaging and Labeling Information

The second generation of LUXEON CoB with CrispWhite Technology LEDs are packaged in tubes then in a carton box. Each tube contains a specified number of LEDs. The LEDs in each tube come from a single category code, ensuring they are all well-matched for light output, color, and forward voltage. Each tube contains a rubber stopper at one end. The tube label has both alphanumeric and bar code information. The carton boxes have printed information providing part numbers with CAT codes that indicate luminous flux, color and forward voltage bins.

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world better, safer, more beautiful—with light.
