LUXEON XF-3014 CV

Flexible light source distributing uniform light across user selectable lengths

LUXEON XF-3014 CV is for constant voltage driven applications that require a flexible design capable of maintaining uniform light distribution over long lengths. These current regulated flexible strips come in variable length options and are either cuttable or include snap-together connectors for precision design. LUXEON XF-3014 CV is designed for ease of system integration, faster time to market and best-in-class reliability.

LUXEON XF-3014 CV is available in the following configurations:
- 6 LEDs per segment cuttable every 96mm
- 6 LEDs, 96mm segments with connectors
- 30 LEDs, 480mm segments with connectors

### FEATURES AND BENEFITS

General Product Information

Product Test Conditions
The typical input voltage for each LUXEON XF-3014 CV strip is 24V. Each 96mm base segment is an LED string composed of 6 LEDs in series. These are connected to constant current regulators which provide 42.5mA per segment nominally.

LUXEON XF-3014 LEDs are tested and binned with a 20ms monopulse (MP) drive current of 60mA at a junction temperature, $T_j$, of 25°C. The minimum, typical, and maximum performance for LUXEON XF-3014 CV in this datasheet are derived from individual LED measurements. The confidence level on all minimum and maximum performance parameters in this datasheet is 99% to within individual LED tolerance.

Part Number Nomenclature
Part numbers for LUXEON XF-3014 CV follow the convention below:

\[
\text{L 2 1 9 – A A B B C D D F V 0 E 0 0}
\]

Where:

\[
\begin{align*}
A A & \quad \text{designates nominal ANSI CCT (27=2700K, 30=3000K, 40=4000K)} \\
B B & \quad \text{designates minimum CRI (80=80CRI)} \\
C & \quad \text{designates sectional type (C=cuttable, 0=not cuttable)} \\
D D & \quad \text{designates number of LEDs per segment (06=6 LEDs, 30=30 LEDs)} \\
E & \quad \text{designates connector option (C=connectors, 0=no connectors)}
\end{align*}
\]

Therefore, the following part number is used for a LUXEON XF-3014 CV 3000K 80CRI cuttable every 6 LEDs without connectors:

\[
\text{L 2 1 9 – 3 0 8 0 C 0 6 F V 0 0 0 0}
\]

Lumen Maintenance
Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance
Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON XF-3014 CV is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

</tbody>
</table>

Notes for Table 1:
1. Lumileds maintains a tolerance of ±2 on CRI measurements.
2. Lumileds maintains a tolerance of ±7.5% on luminous flux measurements.
3. Supply should be capable of providing 42.5mA per 96mm segment or 6 LEDs in series. Current regulated to ±2.5mA for the 6 LED segments and ±12.5mA for the 30 LED segments.
4. Cuttable options feature pre-tinned solder terminals and comes in 19.2m continuous reel.

Electrical and Thermal Characteristics

</tr>
<tr>
<td>Reverse Voltage (V_{reverse})</td>
<td>LUXEON LEDs are not designed to be driven in reverse bias</td>
</tr>
</tbody>
</table>

Notes for Table 3:
1. For full current operation supply should be capable of at least 19V and 42.5mA per 6 LEDs segment (96mm).
2. Proper current derating must be observed to maintain the junction temperature below the maximum allowable junction temperature.
3. Measured at Tc point next to LED. See AB208 for details.
4. Measured at Tc1 point next to Constant Current Regulator.

About Lumileds

Lumileds is the global leader in light engine technology. The company develops, manufactures and distributes groundbreaking LEDs and automotive lighting products that shatter the status quo and help customers gain and maintain a competitive edge.

With a rich history of industry “firsts,” Lumileds is uniquely positioned to deliver lighting advancements well into the future by maintaining an unwavering focus on quality, innovation and reliability.

To learn more about our portfolio of light engines, visit lumileds.com.
