LUXEON XR-TX
High performance LED modules with extreme efficacy for robust lighting designs

LUXEON XR-TX products are LED modules optimized for lighting applications requiring high efficacy LED arrays mounted on a rigid and thermally conductive substrate. These versatile building blocks feature 12 LUXEON TX LEDs on a MCPCB substrate, electrical connectors, and are designed for ease of system integration, faster time to market, and use with industry standard optics. LUXEON XR-TX will become a complete IP66 solution when used in combination with standard third party optics and heat sink.

### FEATURES AND BENEFITS

- Typical 3300 lumens with 140 lm/W efficacy at 700mA and 85°C board temperature
- A range of CCT options available in 70CRI (4000K–5700K)
- 150mm length x 45mm width footprint designed for use with standard third party optics
- Features industry’s highest efficacy single die emitter—LUXEON TX
- Uses Lumileds proprietary pick and place system, targeting specific LED data points to support the best light output uniformity, Vf, and color control
- One-stop shop for simplified supply chain and faster time to market
- 5 year limited warranty

### PRIMARY APPLICATIONS

- Architectural
- High Bay & Low Bay
- Outdoor
  - Streetlights
  - Tunnel

General Product Information

Product Test Conditions
LUXEON XR-TX products are specified using a forward DC drive current of 700mA and a board temperature, \( T_c \) of 85°C. The LEDs are electrically configured in series which means each LED is driven at equal current.

The LUXEON TX LEDs on LUXEON XR-TX are tested using a DC drive current at 700mA and junction temperature, \( T_j \) of 85°C. The minimum, typical and maximum performance numbers for LUXEON XR-TX in this datasheet are derived from individual LED measurements. The confidence level on all minimum and maximum performance parameters in this datasheet is 99% to within individual LED tolerance.

Part Number Nomenclature
Part numbers for LUXEON XR-TX follow the convention below:

\[
\text{L 2 T 0 - A A B B 0 1 2 M 0 0 0 0 0}
\]

Where:

- **A A** – designates nominal ANSI CCT (40=4000K, 50=5000K, 57=5700K)
- **B B** – designates minimum CRI (70=70CRI)

Therefore, a LUXEON XR-TX, 4000K, 70CRI will have the following part number:

\[
\text{L 2 T 0 - 4 0 7 0 0 1 2 M 0 0 0 0 0}
\]

For LUXEON XR-TX CCT and CRI combinations not listed in this datasheet, contact your local Lumileds Sales Representative or Technical Solutions Manager.

Lumen Maintenance
Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance
Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON XR-TX is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).
## Performance Characteristics

### Product Selection Guide

Table 1. Product performance of LUXEON XR-TX at 700mA, $T_c=85°C$.

<table>
<thead>
<tr>

<tr>
<td>LED Module Storage Temperature</td>
<td>-40 to 105°C</td>
</tr>
<tr>
<td>Reverse Voltage ($V_{reverse}$)</td>
<td>LUXEON LEDs are not designed to be driven in reverse bias</td>
</tr>
</tbody>
</table>

Notes for Table 3:
1. Proper current derating must be observed to maintain the junction temperature below the maximum.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called “ripple,” with frequencies ≥100Hz and amplitude ≤15% of the maximum allowable DC forward current are acceptable, assuming the average current throughout each cycle does not exceed the maximum allowable DC Forward Current at the corresponding maximum junction temperature.
3. Pulsed operation with a peak drive current equal to the stated Peak Pulsed Forward Current is acceptable if the pulse on-time is ≤5ms per cycle and the duty cycle is ≤50%.
5. Measured at $T_c$ point next to LED. See L2T0-xxxx012M00000 LUXEON TX Application Brief for details. Some manufacturers refer to $T_c$ as $T_s$.
6. Per IEC 62031, Ethr=1631 Lux.

Product Packaging Considerations — Chemical Compatibility

The LUXEON TX package contains a silicone overcoat to protect the LED chips and extract the maximum amount of light. As with most silicones used in LED optics, care must be taken to prevent any incompatible chemicals from directly or indirectly reacting with the silicone. Refer to the LUXEON TX Application Brief AB106 for guidelines on chemical compatibilities.
About Lumileds

Lumileds is the global leader in light engine technology. The company develops, manufactures and distributes groundbreaking LEDs and automotive lighting products that shatter the status quo and help customers gain and maintain a competitive edge. With a rich history of industry “firsts,” Lumileds is uniquely positioned to deliver lighting advancements well into the future by maintaining an unwavering focus on quality, innovation and reliability.
