LUXEON F PC Amber

Industry-leading solutions for turn applications

LUXEON F PC Amber and LUXEON F Plus PC Amber automotive LEDs deliver design flexibility and advanced functionality. These products, with their miniaturized form factor are designed to support daytime running lights, side marker and turn signal applications. The Lumileds automotive binning structure meets both SAE and ECE color specifications and is hot binned at 85°C, consistent with actual automotive operational environments. LUXEON F PC Amber and LUXEON F Plus PC Amber provide industry-leading solutions for your front and rear turn applications. All LUXEON F LEDs are AEC-Q101 qualified.

General Product Information

Product Test Conditions
LUXEON F PC Amber LEDs are tested and binned using a 20ms monopulse (MP) at 350mA drive current for LUXEON F PC Amber and 1000mA for LUXEON F Plus PC Amber, case temperature, \( T_c \), of 85°C.

Part Number Nomenclature
Part numbers for LUXEON F PC Amber and LUXEON F Plus PC Amber follow the convention below:

\[
L \ F \ M \ H - A\ B\ C - E\ F\ G\ H
\]

Where:
- \( L \) designates LUXEON
- \( F \) designates LUXEON F product family
- \( M\ H \) designates hot binning
- \( A \) designates color variant (L=PC Amber)
- \( B \) designates die size (1=1mm\(^2\))
- \( C \) designates binning current (A=350mA and C=1000mA)
- \( E \) designates future product offerings
- \( F\ G\ H \) designates minimum luminous flux

Therefore, the following part number is used for a LUXEON F Plus PC Amber 1000mA with a minimum luminous flux of 150 lumens:

\[
L \ F \ M \ H - L\ A\ C - 0150
\]

Environmental Compliance
Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON F PC Amber and LUXEON F Plus PC Amber is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted material to this LUXEON F: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).
Performance Characteristics

| ESD Sensitivity $^{[2]}$         | ±8 kV HBM, ±400 V MM, ±2kV CDM        |
| Reverse Voltage (V)              | LUXEON F LEDs are not designed to be driven in reverse bias |
| Autoclave Conditions             | 121°C at 2 ATM 100% Relative Humidity for 96 Hours Maximum |

Notes for Table 4:
1. Proper current derating must be used to maintain junction temperature below the maximum. LUXEON F LEDs driven at or above the maximum LED case temperature may have shorter lifetime.
2. Measured using human body model (per JESD22 A114), machine model (per JESD22 A115) and charged device model (per JESD22 C101).

Product Bin and Labeling Definitions

Designing with LUXEON F PC Amber and LUXEON F Plus PC Amber
Flux bins supportable for car programs depend on product color and program start- and end-of-production date. Flux roadmaps by year and product color are maintained and available from the sales representative. Please contact your local sales representative to request the flux bin range with best supportability for program timing.

Decoding Product Bin Labeling
In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheets. For this reason, Lumileds bins the LED components for luminous flux, color and forward voltage.

LUXEON F PC Amber and LUXEON F Plus PC Amber are labeled using a 3-digit alphanumeric CAT code following the format below.

A  B  C
Where:

A – designates luminous flux bin (example: D=70 lumens to 80 lumens)
B – designates color bin (example: A or B)
C – designates forward voltage bin (example: B=2.55V to 2.79V)

Therefore, a LUXEON F PC Amber with a lumen range of 70 to 80, color bin of A and a forward voltage range of 2.55 to 2.79V has the following CAT code:

D  A  B

Luminous Flux Bins
Table 5 lists the standard luminous flux bins for LUXEON F PC Amber and LUXEON F Plus PC Amber emitters. Product availability in a particular bin varies by color and platform start of production date. Contact local sales representative for best supportability of programs.

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world safer, better and more beautiful—with light.

To learn more about our lighting solutions, visit lumileds.com.
